

Ionic 4 now uses  
**Angular Router**

```

const routes: Routes = [
  { path: '', component: LandingPage },
  {
    path: 'browse',
    loadChildren: () =>
      import('./browse/browse.module')
        .then(m => m.BrowserModule)
  },
  {
    path: 'album/:id',
    loadChildren: () =>
      import('./album/album.module')
        .then(m => m.AlbumModule)
  },
  {...},
  {...},
];

```

```
<ion-router-outlet></ion-router-outlet>
```
